Sterling Leisure Products Unveils the Covana

Covana Spa Cover Offers Beauty and Function

Calgary, Alberta, Canada – The new Covana all in one spa cover gazebo made by Sterling Leisure Products is designed to enhance the spa experience by offering enhanced functionality, protection from the elements and energy savings.

The Covana acts as a gazebo for the spa, automatically elevating and lowering with the turn of a key. Unlike most covers which require considerable strength and leverage to pull on and off, the Covana elevates and lowers effortlessly, eliminating any heavy lifting or straining. The Covana can be raised to its full elevated height of 8 ½ feet within 20 seconds – the operator simply removes the key to secure the cover at the desired height. The pitched roof design easily sheds rain and snow and increases the character and aesthetics of the spa, offering a gazebo-like environment without the cost, maintenance and space.

Whether you are battling wind, sun or bugs, the Covana will protect you. The overhead canopy provides excellent protection from harmful UV rays, rain or snow. Optional screens give privacy from onlookers and additional protection from the elements.

The Covana offers considerable energy savings by reducing water loss through evaporation and reducing your heating bills. The use of polyurethane foam gives the Covana an insulation value of R-25 while the seamless design reduces the evaporation of water and chemicals. Unlike traditional covers that are flipped over the spa, the tight seal and perfect fit of the Covana cover keeps debris out of the water more effectively and reduces the amount of effort required to maintain water quality.

The Covana cover is built to provide years of worry free performance and protection. A balanced load design is the core of the Covana lift system. Similar to garage door systems, minimal horsepower is required lowering the costs and wear and tear on components substantially. The free standing design is virtually maintenance free.

The Covana safely and securely locks in place preventing children and other unwanted intruders from gaining access to the spa. When in the lowered position, the Covana can support up to 600 pounds, providing more barrier protection than any other spa safety device.

Optional privacy screens, lights and speakers can be purchased to create an inviting ambience.

Sterling Leisure Products is a Canadian company. The founders Raymond Bussière and Mario Piché bring over 50 years of experience in innovation, manufacturing and business management.
